Introduction

—

About Us

We are a technology company offering customised software development, AI-powered automation, cloud computing, and telecom services & infrastructure. We help businesses streamline their processes, reduce cost, increase productivity, and profitability.

A close-up photograph of two people in business attire shaking hands, symbolizing a partnership or agreement. The background is blurred, focusing on the hands and forearms.

Introduction

Our team has over three decades of experience delivering technology solutions. We help with telecom strategy, infrastructure development, regulatory policy, software development for Telecom, Education, Healthcare and Retail industries. We supply robots and offer Robotic Process Automation, and cloud computing services.

Our H/Q is in Melbourne Australia & offices are located in Canada, USA, UAE and Pakistan.

Vision

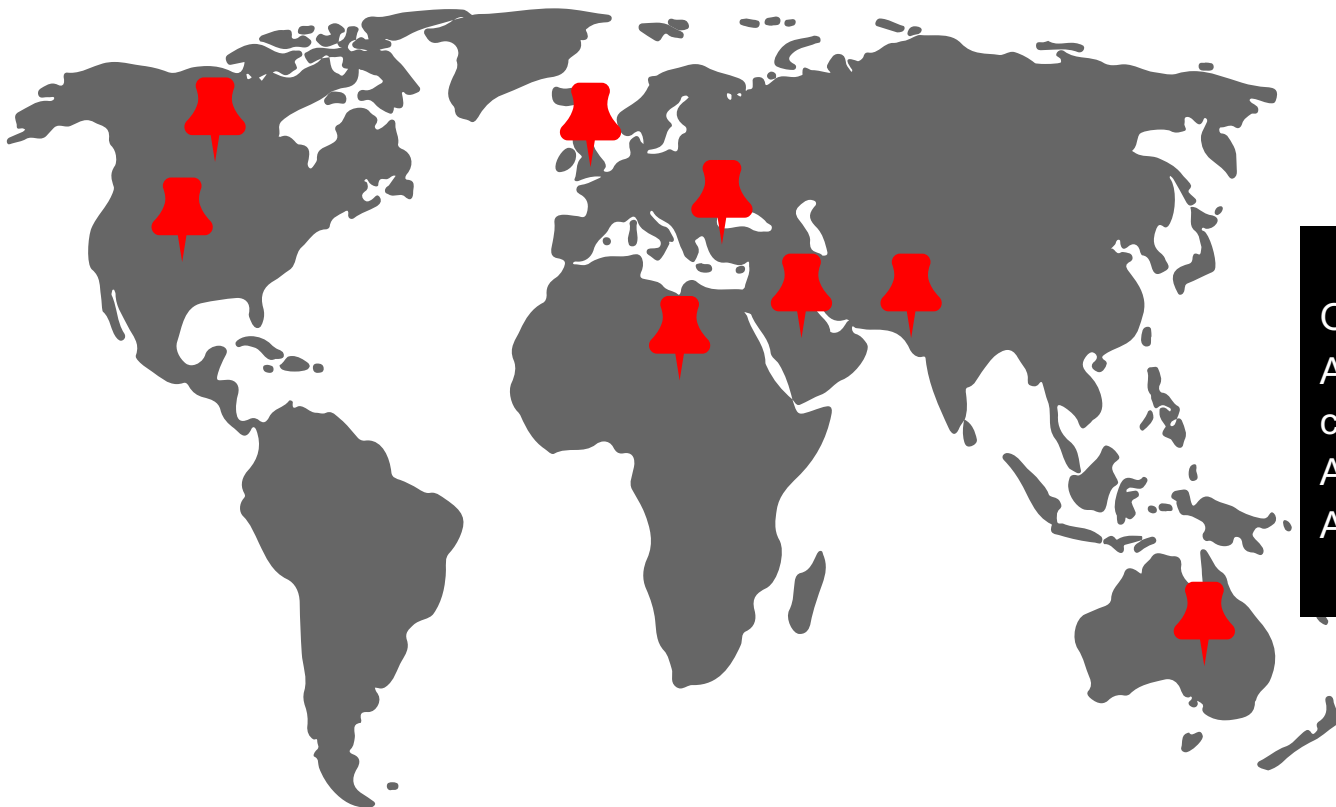

To automate & simplify the life of business owners by digitally empowering their business

Mission

Our mission is to become one of the top providers of technology solutions & services in Australia & Pakistan, offering a delightful experience.

Countries we serve

Our head office is at Melbourne Australia. We serve our customers in Canada, USA, Africa, UK, Middle East, Central Asia, Australia and Pakistan

02

Cloud Services

We offer cloud services for retail, telecom, education and healthcare. You can track your assets in a pharmacy, in your hospitals & buildings using our state of the cloud & IoT technology.

We offer Cloud migration, App integration and backup/storage. Remotely monitor & track your patient's health data & vital signs through real-time monitoring system.

Telecommunications

TeleCodia offers telecom solutions for service providers, healthcare, retail and education. We offer telecom strategy, eGovernance, consulting services, cloud voice, SIP Trunks, video communications, contact center solution, broadband internet and mobile phone plans.

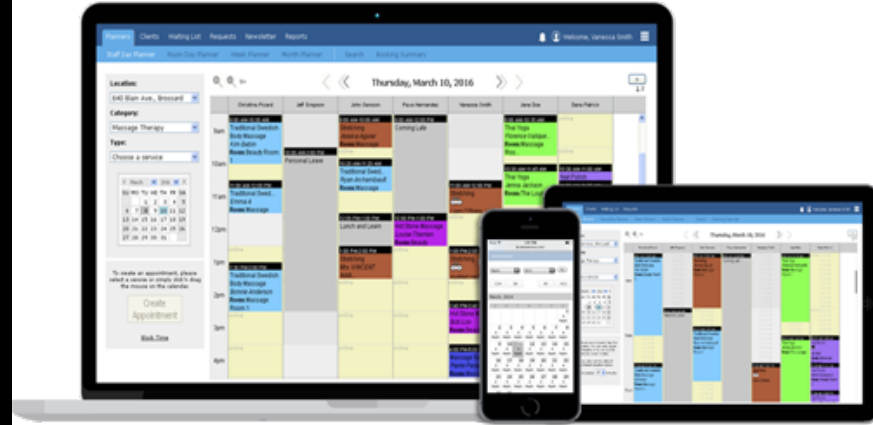

Our prices and plans are suited for small, medium and enterprise businesses.

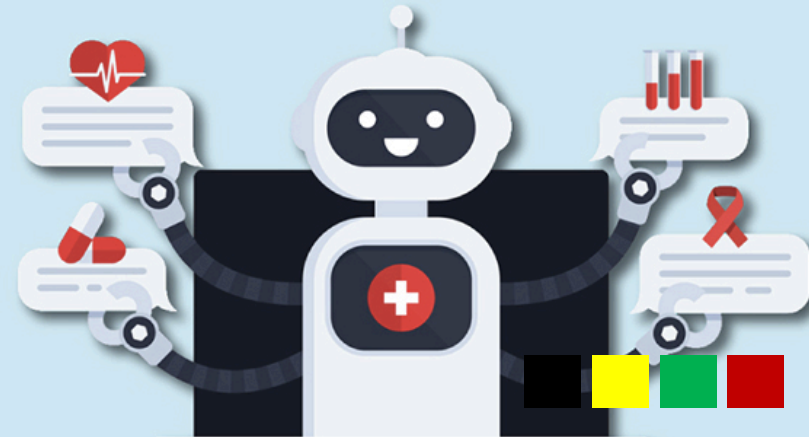

Software & AI

We provide customised software solutions, appointment booking apps, voice assistants & AI chatbots.

We deliver AI-enabled conversational exchange and a personalized experience for your customers. Mobile & Web Apps, eCommerce Software and IOT related software services are available.

CHATBOTS FOR HEALTHCARE

Automation

We help customers with automation strategy, a framework that provides businesses with a comprehensive and integrated approach to the automation of processes.

Robotic process automation (RPA) and business process automation (BPA) are both defined by automation strategies that measure scope, reliability, and impact.

We supply robots for industrial and hospital use.

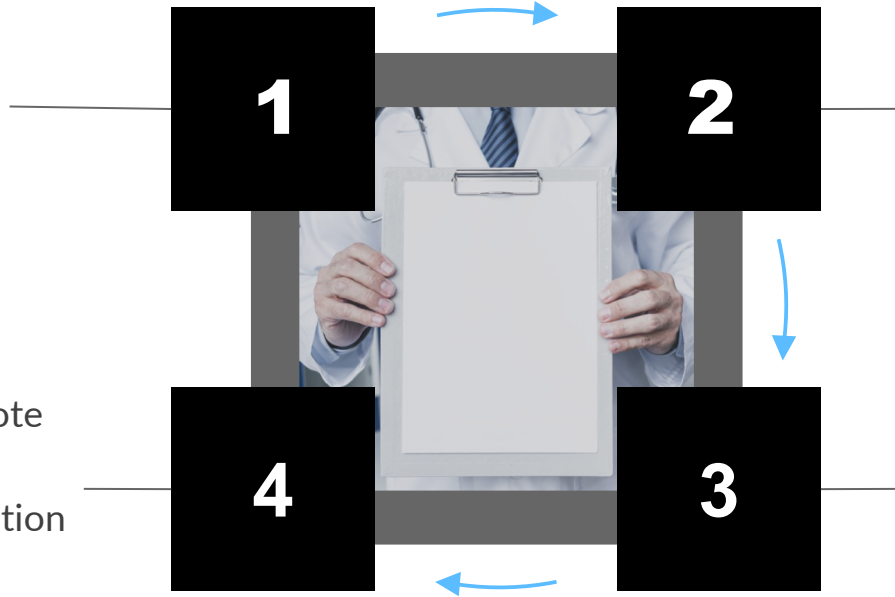

03
